

SUDHARSAN S

Coimbatore, India | sudharsan24csc@gmail.com | +91 6369584142

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science Engineering student with a strong academic foundation and hands-on experience in full-stack web development, AI/ML integration, and cloud technologies. Proficient in Python, React, and database management, with demonstrated ability to build impactful real-world solutions including a Natural Language CLI for Google Cloud (Hackathon Third Place winner) and a real-time criminal identification system using facial recognition. Passionate about software development and eager to contribute innovative ideas to dynamic engineering teams.

EDUCATION

PSG College of Technology, Coimbatore <i>BE in Computer Science and Engineering</i>	2023 – 2026
Muthayammal Polytechnic College, Namakkal <i>Diploma in Computer Science and Engineering</i>	2020 – 2023
Relevant Courses: OS, DSA, DBMS, OOPs, Distributed Computing, Computer Networking	

SKILLS

Languages: Python, C (Fundamental knowledge)
Frameworks & Web: React, HTML, CSS
Databases: MySQL, MongoDB
Area of Interest: Web Development, Software Development

PROJECTS

Natural Language CLI for Google Cloud

Developed a local CLI tool that converts natural language into executable gcloud commands using a locally hosted LLaMA 3 model via Ollama. Leveraged Google Cloud SDK to train and validate command mappings. Achieved high accuracy and low latency without relying on external APIs.

Tools: Python, LLaMA 3, Ollama, Google Cloud SDK, gcloud CLI, NLP, Local LLM Inference

ISearch – Intelligence Search

Developed a real-time mobile criminal identification system for law enforcement, leveraging FaceNet for facial recognition and Firebase for secure data management. Utilized deep learning and computer vision to replace manual identification methods, improving accuracy and reducing response time in the Coimbatore region.

Tools: Flutter, FastAPI, Firebase (Auth), FaceNet, OpenCV, Python

IP Project – AI Based Study Material Query Assistant

Developed a document-based AI query system using .NET Framework and Azure Cosmos DB that enables users to upload study materials (PDFs) and query them contextually. Supports both raw data extraction and summarized response modes, ensuring zero hallucinations and accurate retrieval.

Tools: HTML5, CSS3, JavaScript, C#, ASP.NET Core, MySQL, Azure (Blob Storage, AI Services), ChatPDF API, JWT, SAS Tokens

HACKATHON

- NEXUS Hackathon 2025 – Natural Language CLI for Google Cloud – Third Place

CERTIFICATION

- Python Programming Course – Softrix Technology, 2023 | Gained hands-on experience in core Python concepts, scripting, and real-world applications
